Instructions

All Puppets

1. Color each puppet.
2. Cut out each puppet and the parts.

Leo Lizard

1. Fold Leo's legs on the dotted lines. Fold the feet up and fold the knees to meet the feet.
2. Tape the legs to the under side of the puppet. Tape the front legs behind the arm holes of Leo's shirt. Tape the back legs below Leo's shirt.
3. Leo's head is formed by taping the flap on each side of his eyes under the nostrils. The neck should be folded slightly back so the head will stand up.
4. Tape the two side tabs together under his belly, this space should fit your fingers tightly in order to control the puppet. If the tabs are too long you may cut them to fit your fingers.

Diamondback Dan

1. Diamondback Dan, has flaps on the side of his head. Fold the flaps down toward the snake. Tape the flaps under the head of the snake.
2. Tape the fangs under the nostrils of the snake.
3. Fold the tabs under the snake, cut the tabs to fit your fingers and then tape the tabs together. The tabs taped together should be tight to your fingers for control of the snake.

Olivia Owl

1. Olivia Owl is symmetrical. Fold the puppet in half matching the wings. When the owl is folded it is easy to cut the slits in the middle of the owl. The slits are spaces for your fingers.
2. Fold the wings of the bird toward the middle of the puppet on the line of the body. Folding the wings slightly allows the wings to easily flap.
3. To operate owl, put your middle finger through the middle slots and use your ring and index finger to flap the wings.
